PROVIDING PROFITABLE FOOD PROCESSING SOLUTIONS SINCE 1932.

Since 1932, Mepaco has engineered cooking, blending and material handling technology for some of the leading brands in food processing. We strive to offer finely tuned, integrated systems that provide a solid ROI for our customers. With our complete product offering and technical expertise, we work with your engineering, production and purchasing team to provide a safe and sanitary solution that meet your goals for production efficiencies. Whether it's an individual piece of equipment, upgrades to an existing line or a complete integrated system, Mepaco is your single-source supplier.

System Experience:

- Hopper / Auger Systems
- Rotary Dough Lines
- Thermal Processing Systems
- Mixing / Blending Equipment
- Cooling Product Applications
- Material Handling
- Sanitary Belt Conveyors
- Specialty Kibbler Equipment
- Dough Trough Tilter / Dumper

Industry Sectors:

- Cookies and crackers
- Pie Fillings
- Granola and Protein Bars

CUSTOM METAL FINISHING

Increase corrosion resistance and reduce product adhesion with Mepaco's custom metal finishing solutions! Full submersion "pickle passivation" offers a cost-effective way to eliminate corrosion caused by welding and machine tools through the restoring of the oxide layer that protects the surface and leaves a clean and restored uniform appearance. Electropolishing offers an electro-chemical process that restructures product contact surfaces leaving a microscopically polished, smooth surface that is void of oxides and impurities. As a result, a sterile, bright, passive finish reduces surface friction and product adhesion.
